## Construction Update

July 18, 2024

*Framing for new restroom facilities*

The contractor has removed and hauled away the asphalt from Towne Park in preparation for the new walking path.

In the coming weeks, the contractor will continue progress on the new storm sewer and underdrain installation for the new bathroom facilities. Underdrains are a drainage feature that is installed underground to collect subsurface water and transport it to designated on-site drainage basins to prevent flooding.

We look forward to sharing more with the community as the project progresses!
